Speed+™
Analyzer Performance Upgrade

GASES & CHEMICALS	CEMS	ENERGY	SEMI & HB LED	ATMOSPHERIC	LAB & LIFE SCIENCE

No Compromise!

Tiger Optics is excited to introduce a new analyzer performance upgrade. Implementing new intelligent dynamic data processing, the Speed+ software adjusts your analyzer's response automatically and in real-time to deliver the best performance.

Benefits of Speed+ for your operations include real-time process control to ensure quality, as well as faster throughput and increased capacity to improve efficiency and profitability.
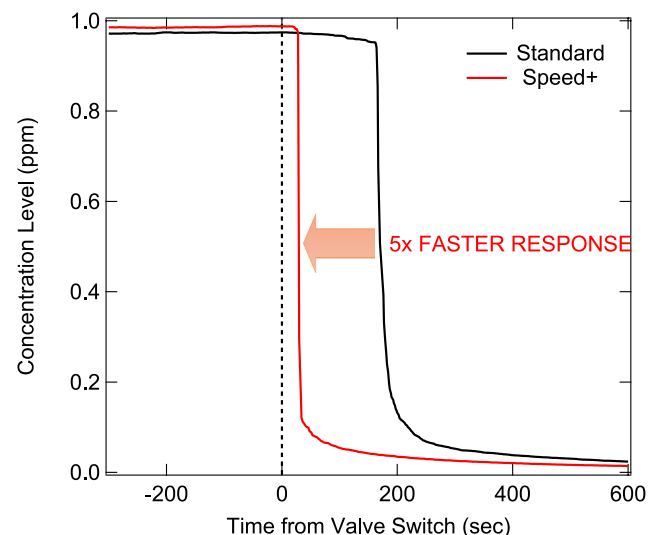

Speed+ features in detail:

- Available as upgrade for the following existing or new analyzer models:
  - Spark
  - HALO OK
  - HALO 3
  - HALO KA
- Requires firmware version 6.0.0 or higher*
- Boosts analyzer's speed of response without sacrificing sensitivity or measurement precision
- Analyze with Ease™—no manual adjustments required, Speed+ is fully automatic

*Upgrade of analyzers with firmware versions prior to 6.0.0 is possible with additional hardware upgrades.

Contact Tiger Optics or your authorized distributor to boost your analyzer performance with Speed+!

Example of Speed+ performance improvement using a HALO OK

5x FASTER RESPONSE
